

Speech by
Business Partner – JOLU GROUP
Mr. Hesbon Mochama
During our Mega Company Launch
On 23rd Aug, 2025
Nairobi, Kenya

Good afternoon, ladies and gentlemen, distinguished guests,

It is an honour to stand here today as a proud partner of Jolu Group at this historic launch. We thank the Almighty for giving us the strength and good health to witness this new chapter.

At Jolu Machineries, our story is about one thing — empowering Kenyan farmers with reliable, affordable, and high-performance machinery. We are proud to have pioneered the introduction of Zoomlion tractors into the Kenyan market. And today, as we celebrate this launch, we reaffirm our commitment to bringing world-class solutions closer to our farmers.

Why Zoomlion? Because these machines are built for the Kenyan farmer. From the 50 HP tractors designed for smallholder and medium-scale farmers, to the 160 HP tractors that power large-scale farms and sugar factories — we have solutions for every level of agriculture. Just last season, Angata Sugar Factory trusted us with 60 tractors and implements. That is the confidence this brand inspires.

But we know farmers need more than tractors. They need a partner. That is why we also provide rice harvesters, combine harvesters, ploughs, and planters, as well as strong after-sales support. Every machine comes with a one-year warranty or 1,000 hours — and more importantly, guaranteed availability of spare parts and skilled technicians across all our branches.

Accessibility is also at the heart of our mission. Farming cannot wait, and neither should financing. Together with our banking partners — Equity Bank, KCB, Co-op Bank, Bank of Africa, Kingdom Bank, SACCOs, and microfinance institutions — we make it possible for farmers to acquire machinery through flexible financing. This year alone, over 45 farmers and institutions have already benefited. And this is only the beginning.

Ladies and gentlemen, Jolu Machineries is not just selling tractors — we are fueling transformation. We are helping farmers plant on time, harvest on time, and scale their businesses with confidence. That is the impact of this partnership.

As we launch today, my invitation is simple: to our farmers, our partners, and our friends — join us. Visit our branches in Nairobi, Nakuru, Eldoret, Kisumu, and Migori. Talk to our dedicated team. Experience the reliability of Zoomlion tractors, and let us walk this journey with you.

Together, with Jolu Group and all our partners, we are not just launching a company. We are launching a movement to power agriculture, strengthen communities, and secure a brighter future for Kenya.

Thank you, and God bless you.
